Wm are glad to bear that the negotiations between the Colonial Office, the Admiralty and the War Office on the question of the extension of the Prays in front of the Naval and Military establishments in this Colony are in course of progress. We shall be still more gratified to hear of their successful completion. The question is one of great importance to the Colony at large. At prement the Naval Eard and the Barracks interpose an impassable barrier to the continuetion of one of the most frequented commercial thoroughfares in the City of Victoria, and there is no means of relieving the .vast and uncessing stream of traffic that now flows along the Queen's-road East. THE FRENCH CHAMBERS ON THE TONQUIN QUESTION. Paris, 30th Oct bor.

In the Chamber of Deputies to-day, Grapott on the Extreme Left, interpellated the Govern ment upon its policy in Tonquin and requested an explanation of the objects sought to be obtained in the leans to conduct the expedition in that country. Granett pointed out what were apparent contradictions existing in the information furnished by the Government, and said it was centrary to official de larations that the difficulties have been raised by Chius. Granet represented the Government with con-

cealing the facts and distrusting the patriotism of the Circubers, Reverting to the Bourée treaty, he said that China had threatened resistauce and there was danger of war. The errors of the Government, had compromised the country. The present moment, he declared, was a critical one, and France should turn her eyes towards passing the Vosges.

M. Challemel-Lacour, Foreign Minister, in reply to Granet, repudiated the idea of the Longnin expedition' being an adventure. The French were, he said, encountering a more formidable opposition than was expected, but the difficulties were far from insurmountable. China ha i availed berself of the blockade of the coast of Annam to claim her suzerainty, and the home opposition had used it. At this point the speaker was interrupted by

Pappan, Clemenseau and Douville, who protested against his remarks. Resuming. Challemel-Liacour said the Govern-

ment had no intention of advancing upon Hué until it became necessary to strike a resounding blow. The speaker justified the occupation of Hus and the forts, which had resulted in a treaty and the clearing up of the situation. The Chamber then took recess. Upon resumption of the sitting, Challemel-La-

cour continued. He said the Government had failed in none of their engagements, nor was there any contradiction between their acts or record. No important event had occurred making necessary the early contoking of Parliament. The French were masters of three-fourths of the Red river delta and the enemy occupied but two important places, from which reinforcements would dislodge them. All the documents necesmary had been published, and those not published in the Yellow Book only showed the inconsistercies of China's policy. It was clear that China mever really sought a compromise, but simply wanted to gain time, while France had sincerely endeavoured to arrive at an agreement without accepting the humilistion of capitulation.

M. Challemel-Lacoursaid that China had never recognised the Bourés treaty and the onderstand. ing between France and China that had been effected thereon. It was evident that China had sought to expel the French from Tonquin. The Chinese at length decided to formulate propositions demanding the recognition of their suzerminty and the evacuation of places occupied by the French, but did not attempt to discuss the rights conferred on France by her treaties with Annam. They simply ignored those rights and declared Tonquin to be their property, and demanded that the French should retire, promising to conceds to France a proposition similar to that which she now occupies in certain parts of China. France sent a reply, stating what she considered a possible basis of agreement. The Cabinet, he said still on sidered the Hourse treaty inadmissible, but the constitution of a neutral zone between Tonquin and China would oreate a situation advanta reous to France. To sam up, China demanded a reversion to the state of things which existed prior to the year 1:73. France, be declared, must proceed firmly and rapidly in the work thus far advanced. The negotiations with China, he added, have been only interrupted. Let events speak for themselves. Porhaps the time will come when China will be happy to find us still ready to enter into arrangements compatible with France's interests and houser. France basnever departed from firmuess and moderation. The force of circumstances has rendered her the representative of the interests of all Europe in the East. M. Challemel-Lacour concluded by declaring that the Chamber had to express con-

vears or more, even after the management of the theatre had passed into the hands of Mr. Leater Wallack, the soil of the founder, Wallack's was the model theatre of the United States. Unfortunately, the theatre with the revolver. . . It will not be permissible has sadly fallen away of late; it has gone to discharge the revolver until the constable has been back while theatrical art has gone forward both in England and in America. One cause of the decadence of Wallack's was Time -Midnight. Mr. WILLIAM Stres discovered undoubtedly its loyalty to England, Mr. Wallack took no note of the strong national feeling which swept over the United States after the close of the robellion. His ideal was narrow enough to be called provincial E colonial were not a more appropriate word. He relies only on plays imported from England, changing from "Youth" to. "The Parvenu," and from "The Silver King" to "Impulse." The result of this colonial policy has been that Wallack's has soon fow genuine successes in the past halfdozen years. It seems that tastes differ, and the American playgour Zoes not always say ditto to the English playgoor-indeed be often quashes the English verdict. COINCIDENCE OF EARTHQUAKES.

At a time when the recurrence of very destructive earthquikes in different parts of the globe is attracting attention, it is worth noting that an earthquake which occurred at Irkutak, in Siberia, on the night of one day, at 11h. 20m., was followed by one which was felt all over northern Moravia shout 3.30 p.m. next day. The difference in latitude between the two localities is about 23deg.; in longitude about 87deg. Thus; allowing for the equation of time, the Moravian earthquake came about 22 hours after that at Irkutek. There appear to be certain centres of earthquake convulsions, such as the Greek Archipelago, Southern Spain and Portugal, and the Italian Peninsula, Whenever shocks are felt in Europe one or other of these centres is involved. It can scarcely be said that any theory has yet suggested a reasonable explanation of the mode in which they are connected. Liabon has afforded terrible illustrations of liability to repetition of ly in the occupation of Messrs. Elles & Co. disaster.
